Striped toothpaste was invented by Leonard Marraffino in 1955. The patent (US patent 2,789,731, issued 1957) was subsequently sold to Unilever, who marketed the novelty under the Stripe brand-name in the early 1960s. This was followed by the introduction of the Signal brand in Europe in 1965 (UK patent 813,514).

Toothpaste - Wikipedia

Introduction. Dentin abrasivity of toothpastes is an important information for consumers and is used by companies to advertise their products. According to the current ISO standard [11609:2017 ()], there can be two main methods to test this feature in the laboratory: either a radiotracer-based method or profilometry (). Both methods can test relative dentin abrasion (i.e., abrasivity) by ...

Frontiers | Buffer Solution Reduces Acidic Toothpaste ...

The development of the kind of toothpaste we're used to began in the 1800s. Before the 1850s, toothpaste was a powder. Early versions in the 1850s contained soap or chalk. Betel nut was included in toothpaste in England around the 1800s too. Later in the 1860s, some homemade toothpaste used ground charcoal, similar to ancient Greek versions.

The Ancient History of Toothbrushes and Toothpaste - Colgate

Research has shown that good oral health can have a positive impact on overall health. 1 It is no secret that maintaining good oral health is accomplished through an at home oral hygiene routine that includes the use of a fluoride toothpaste. One differentiating factor among oral care products such as toothpaste is the active ingredient, fluoride. The most commonly used fluoride sources today are sodium fluoride, sodium monofluorophosphate, and stannous fluoride. 3,4 The first 2 forms are ...
