(Calculus) by . . .

The general
process for
solving linear-
programming

exercises is to
graph the
inequalities
(called the
"constraints")

to form a walled-
off area on the
 x, y -plane
(called the

Access Free

Applied

Calculus With

Linear Programming
Feasibility region"). Then you figure out the coordinates

of the corners

of this

feasibility

region (that is,

you find the

intersection

points of the

various pairs of

lines), and test

these corner

Access Free
