## **Bar Stock Model Steam Engine Plans**

This engine was designed following a number of requests for a simple machining project. There are many other oscillating steam engine designs, and some are much simpler, using plumping fittings and wire links etc... However because this engine was designed to be a machining project, bar-stock was used for all the parts. The design had several key features : It used no castings and no brazing ...

## **Steam Engines - packrat workshop**

All of our plans projects are machined  
from metal bar stock (supplied by the  
builder) and no castings are required.

This is the lowest cost way for you to  
build as the metals can usually be  
purchased from metal salvage yards  
for around \$2.00 or so per pound for  
aluminum, brass and stainless steel.

But as can be seen, most of the model  
engines are designed to look like they
