Synopsis: Street photography is spontaneous, a moment captured by the camera. "Bystander" chronicles the development of a photographic genre created from the chaotic energy and chance juxtapositions of everyday street life. The setting might be a crowded city pavement, a country lane, a park, an underground station or cinema lobby - any public place where the photographer's subjects are privately engaged, either unknown to the photographer or unaware of his or her presence.

According to Bystander, the first book done on street photography was in 1877 by John Thomson, a Scottish photographer. He titled the book: "Street life in London". Interesting to note that most of the subjects in the photographs posed for him, as the "collodion" process he used (which emphasized sharpness) needed a very slow film speed.
