~~C4.5: Programs for Machine Learning by J. Ross Quinlan ...~~

C4.5 is an algorithm used to generate a decision tree developed by Ross Quinlan. C4.5 is an extension of Quinlan's earlier ID3 algorithm. The decision trees generated by C4.5 can be used for classification, and for this reason, C4.5 is often referred to as a statistical classifier. In 2011, authors of the Weka machine learning software described the C4.5 algorithm as "a landmark decision tree program that is probably the machine learning workhorse most widely used in practice to date". It became

~~C4.5: Programs for Machine Learning
by Quinlan, J. Ross ...~~

The chapter describes a set of computer programs that construct classification models of the second kind, that is, by discovering and analyzing patterns found in such records. Their collective name is C4.5, which is also the name of the principal program, a descendant of an earlier program called ID3.
