Which two features of the hierarchical design make it the better choice? (Choose two.) lower bandwidth requirements

CCNA 2 Routing & Switching ... - CCNA Exam Answers.com

The backup link should have a number higher than 1. The correct answer has an administrative distance of 10. The other quad zero route would load balance packets across both links and both links would appear in the routing table. The remaining answers are simply static routes (either a default route or a floating static default route).
