Changing Eating Behaviour Broadening Social Marketing By

On the 26th June 2012 the Foundation held its 45th anniversary conference entitled Behaviour change in relation to healthier lifestyles. This featured expert speakers in areas of behavioural science, weight control, physical activity, eating behaviour and a number of case studies to show how behaviour can be changed for the better in practice.

Behaviour change - British Nutrition Foundation

A major determinant of human eating behavior is social modeling, whereby people use others' eating as a guide for what and how much to eat. We review the experimental studies that have independently manipulated the eating behavior of a social referent (either through a live confederate or remotely) and measured either food choice or intake.

Social modeling of eating: A review of when and why social ...

Eating behaviour is strongly influenced by social context. We eat differently when we are with other people compared with when we eat alone. Our dietary choices also tend to converge with those of our close social connections. One reason for this is that conforming to the behaviour of others is adaptive and we find it rewarding.

Social influences on eating - ScienceDirect

Similarly an intervention study using videos to change eating behaviour reported that rewarding vegetable consumption increased that behaviour (Lowe et al., 1998). The relationship between food and rewards, however, appears to be more complicated than this.
