~~Data Communications and Networking by Behrouz A.
Forouzan~~

Data communications refers to the transmission of this digital data between two or more computers and a computer network or data network is a telecommunications network that allows computers to exchange data. The physical connection between networked computing devices is established using either cable media or wireless media.

~~Data Communication & Computer Network – Tutorialspoint~~
Data Communications and Networking is designed to help students understand the basics of data communications and networking, and the protocols used in the Internet in particular by using the protocol layering of the Internet and

TCP/IP protocol suite. Technologies related to data communication and networking may be the fastest growing in today's culture.

~~Data Communications and Networking: Forouzan, Behrouz A...~~

Data communications are the exchange of data between two devices via some form of transmission medium such as a wire cable. For data communications to occur, the communicating devices must be part of a communication system made up of a combination of hardware (physical equipment) and software (programs).
