Density  
Worksheet Chemistry In Context

Density is the relationship of the mass of an object to its volume. Density is usually reported in units of grams per cubic centimeter ( $\text{g/cm}^3$ ). For example, water has a density of  $1.00 \text{ g/cm}^3$ . Since a cubic centimeter contains the same volume as a milliliter, in some cases you may see density expressed as  $\text{g/mL}$ .

Chemistry in Context 2008-9 Perhaps someone has tried to trick you with this question: "Which is heavier, a pound of lead or a pound of feathers?" Many people would instinctively answer "lead." When they give this incorrect answer, these people are really thinking of density. If a piece of lead and a feather of the same volume are weighed, the lead ...
