Circular patterns in the patio layout draw your attention to the firepit in the middle. By using flat rocks, the homeowner has given the design a DIY feel, and the stones match with some of the stones used throughout the garden. What's especially fun about this patio, though, is the swing hanging by the curved arbor.

~~50 Best Outdoor Fire Pit Design Ideas for 2020~~

Planning for fire protection involves an integrated approach in which system designers need to analyze building components as a total package. The design of any fire-protection system is an exact science that takes into account a building's use, occupancy, footprint, and even its other installed systems. "Fire-protection systems are complicated and sophisticated, and are different for just about every building," notes Jeffrey E. Harper, engineering manager and vice president at Rolf ...

The Key Design Elements: The layout features a sofa facing out, keeping the view and conversation away from the fireplace. We chose a luxe chaise sectional to create a stunning centerpiece in the room. An office in the living room allows the space to be multifunctional— otherwise, the fireplace might've taken up too much space. The living room features a mix of styles and allows the quirkiness of the layout to feel intentional.
