Common Core Algebra I - eMathInstruction

eMathInstruction was created on the simple premise that traditional textbooks are no longer the future of math education. Our system of electronic curricula, videos, and printed workbooks are scaffolded to foster deep understanding and develop mathematical skills. We encourage students to keep thinking and solving problems.

The Common Core State Standards covered in Common Core Algebra I by eMath Instruction were chosen to align to the End of Year (EOY) Assessment Standards chosen by the PARCC Testing Consortium. Two documents on this page have been included to show how we have aligned our lessons to these standards. The first shows the standards on the EOY Assessment along with the lessons in which they are covered.

The instructional materials reviewed for eMathInstruction Common Core for High School Mathematics series partially meet expectations for developing conceptual understanding of key mathematical concepts, especially where called for in specific standards or cluster headings. Across the series, conceptual understanding is developed in the instructional portion of the lessons as students are guided through the mathematical concepts by the teacher and/or instructional videos.

Common core differs from the way that mathematics is normally taught - instead of being taught to solve, students are encouraged to understand the underlying mathematical processes that make up the math that they do in everyday life. This gives them a stronger foundational understanding of mathematics and can benefit students who are planning on eventually going to college.
