~~Earned Value Management System | Three Crucial Metrics of EVM~~

Earned Value Management (EVM) started with a trilogy: PV, EV and AC. However, the relationships between three elements are two: $n \times (n-1)/2 = 2$ (as we all recall from high school, well, maybe). The two relationships are, obviously, SPI and CPI, the two great indicators that come from EVM. However, EVM has received

The concept is based on the measurement of the budgeted value of the actual works performed. For better analysis of the variances, the earned value is used as the third element of reporting in addition to the budget and actual. It also helps in forecasting the time and cost in respect of the remaining part of the execution of the project.
