Virtual Fetal Pig Dissection. Welcome to the Whitman College Biology Department's Virtual Pig Dissection (VPD)! This site is designed as a supplement to laboratory dissections exploring introductory mammalian anatomy and physiology – it is basic and many details have been omitted for clarity. We hope that it is suitable for AP Biology students or for students of introductory anatomy and physiology at the college level.

~~Virtual Fetal Pig Dissection | Whitman College~~

Fetal Pig Dissection Unit Objectives: Identify important external structures of the fetal pig. Identify major structures associated with a fetal pig's integumentary, skeletal, digestive, respiratory, circulatory, urogenital, & nervous systems. Compare the functions of certain organs in a fetal mammal with those of an adult mammal.

~~Fetal Pig Dissection Unit~~

Positioning the pig for dissection Place the fetal pig on a dissecting tray ventral (belly) side up. Use two or three rubber bands to tie the right hind leg around the ankle. Run the rubber bands around the underside of the tray and tie the left hind leg. Repeat for the forelegs.

~~Fetal Pig Dissection Lab – Sam Houston State University~~

Pigs are mammals. Consequently, all of the major structures found in humans are present in the fetal pig. With proper directions, they can all be readily found, especially with large, full term fetal pig specimens. There are a some differences in structural details, mostly relatively minor in nature.

~~Human/Pig Comparisons | Fetal Pig Dissection Guide ...~~

The fetal pig that you will dissect has been injected with a colored latex (rubber) compound. The arteries have been filled with red latex and the veins with blue. An incision was made on the side of the neck to enable the injections. The incision can be seen in the first photograph below.
