The Food Chain Gizmo™ shows a food chain with hawks, snakes, rabbits, and grass. In this simulation, the hawks eat snakes, the snakes eat rabbits, and the rabbits eat grass. 1.

~~Student Exploration Gizmo Answer Key Food Chain~~

A food chain is the sequence of who eats whom in a biological community (an ecosystem) to obtain nutrition. A food chain starts with the primary energy source, usually the sun or boiling-hot deep sea vents. The next link in the chain is an organism that makes its own food from the primary energy source an example is

~~Neshaminy School District / Overview~~

The food chain describes who eats whom in the wild. Every living thing—from one-celled algae to giant blue whales—needs food to survive.Each food chain is a possible pathway that energy and
