purposes.

## Biodiversity and its significance - BIOLOGY TEACH

Strategies for Conservation of Biodiversity:  
The following strategies should be undertaken in order to conserve biodiversity: (1) All the possible varieties (old or new) of food, forage and timber plants, live stock, agriculture animals and microbes should be conserved.

## Biodiversity: Types, Importance and Conservation Methods . . .

# Download Free Forest Biodiversity And Its Conservation Practices In India 1st Edition

Conservation is the strict protection of an area, or protection that is based on a separate management plan or other guidelines with the aim of safeguarding biodiversity. The protection of species is mainly ensured through the protection of their habitats and favouring the structural features of forests that the species need to thrive.

[Biodiversity | UPM.COM](#)

Forest Biodiversity Forests are biologically diverse systems, representing some of the richest biological areas on Earth. They offer a variety of habitats for plants, animals and
