The processing of the timber is the next step in the value-adding chain. This can be done either at a sawmill, where it is sawn, seasoned and graded, ready to be used in building or furniture, or at a paper mill, or at some other plant for processing into chips or fibre. Forests do not only meet our timber needs.

This study points to a third role: the provision of non-wood forest products consumed directly and entering markets. To guide policy-making, several studies ( Scarlat et al., 2015 ; Ronzon and M'Barek, 2018 ) try to quantify the economic importance of forestry and other primary sectors (agriculture, fisheries).
