Geoparks and Geotourism: New Approaches to Sustainability...

Synopsis. This book aims to identify geotourism and geoparks as gateways to socio-cultural, socio-environmental, and socio-economic sustainability in rural areas. At present, geotourism is a new movement helping travelers to increase their knowledge about natural resources, the cultural identities of host communities, and ways of preserving them. The ' emerging tourism ' niche of geotourism is still at an early stage of commercial development in most countries, and geoparks as a ...

Geotourism (abiotic nature based tourism), a new approach Geotourism adds to ecotourism's principal focus on plants (flora) and animals (fauna) by adding a third dimension of the abiotic environment. Thus it is growing around the world through the growth of geoparks as well as independently in many natural and urban areas where tourism's focus in on the geological environment.

[Geoparks and Geotourism: New Approaches to Sustainability...

Abstract. Geoparks, as an innovation for the protection of natural and geological heritages, play an important role in the development of geotourism. While developing geotourism, the establishment of geoparks can generate new job opportunities, new economic activities and additional sources of income, especially in rural regions.

Geotourism and geoparks as novel strategies for socio...

A geopark as a new tourism destination contains a number of geological heritage sites. Geoparks as an innovation for the protection of natural and geological heritage are a network of sites for the transfer of Earth knowledge and the popularisation of geosciences. Moreover, geoparks play an important role in rural development through local involvement in geopark and geotourism activities.

Geo-knowledge Management and Geoconservation via Geoparks...

Geoparks are areas of exceptional geological significance. All of the UK ' s geoparks have internationally significant geology, but what makes them special is that they are community-led partnerships that promote an appreciation of natural and cultural heritage while supporting the sustainable economic development of the area, primarily through geological and eco-tourism.

Geoparks – UNESCO in the UK

Celebrating Earth Heritage, Sustaining Local Communities. UNESCO Global Geoparks are single, unified geographical areas where sites and landscapes of international geological significance are managed with a holistic concept of protection, education and sustainable development. Their bottom-up approach of combining conservation with sustainable development while involving local communities has become increasingly popular.

UNESCO Geoparks

Geotourism (abiotic nature based tourism), a new approach. Geotourism adds to ecotourism's principal focus on plants (flora) and animals (fauna) by adding a third dimension of the abiotic environment. Thus it is growing around the world through the growth of geoparks as well as independently in many natural and urban areas where tourism's focus in on the geological environment.
