equal to the distance a point on the wave is displaced from its resting position. Turn off the lights. Click Play, and then click Pause. Use the horizontal ruler to measure the width of the green trace.

Student Exploration: Waves (ANSWER KEY)

# Where To Download Gizmo Longitudinal Waves

**Explanation:** A sound wave is an example of a longitudinal wave, in which the particle movement is in the same direction as the wave. As a sound source vibrates forward, the molecules next to the source are pushed together, forming a compression. As the wave is transmitted, the molecules are pushed together and then pulled apart, forming a rarefaction. This process repeats as the wave is transmitted.
