The great white shark (*Carcharodon carcharias*), also known as the great white, white shark or "white pointer", is a species of large mackerel shark which can be found in the coastal surface waters of all the major oceans.

Great white shark - Wikipedia

The great white shark's scientific name, *Carcharodon carcharias*, means "ragged-toothed." Great white sharks have muscles that generate heat to keep their core warm, unlike many other shark species....

Great white sharks, facts and photos - Animals

1) Great white sharks can be found throughout the world's oceans, mostly in cool waters close to the coast. 2) These super swimmers are the largest predatory fish (fish that eat other fish or animals) on our planet. On average, they grow to around 4.6m long, but some great whites have been measured at 6m - that's half the length of a bus!
