Remove loose debris and overhanging limbs to allow proper air-flow. Schedule seasonal maintenance. Have your air conditioner and furnace checked out before each heating and cooling season to catch problems before it is too late. Change filters regularly. A dirty filter can severely lower your HVAC system's performance.

1 Turn off the power to the air conditioning air handler or furnace. If the air handler is a gas furnace, turn off the gas at the

Where To Download Hvac Trouble Shooting Guide

gas valve that serves the furnace.
2 Remove the door on the front of the air-handler cabinet so you can access the air filter. Pull out the filter and clean or replace it as necessary.
