~~Engine Problems~~

Hyundai is having problems with the 2013 Hyundai Santa Fe sport 2.0 turbo spark plugs gerrnading inside the head and cylinder combustion chamber. This is causing the vehicle to stall out while driving creating a safety hazard to the driver, occupants of the vehicle as well as other vehicles around the vehicle.

~~Hyundai Santa Fe Engine Failure Problems — part 1~~

The 2012 Hyundai Santa Fe has a huge problem with the engine stalling while driving, with both the users and the NHTSA data showing a significant defect that occurs consistently at very low mileage. The main engine concerns from users refer to engine failure, the engine stalling while driving, the engine lags when starting, and oil leaks. To fix the engine failure, the typical repair cost comes out to an extremely high \$5,100, with the most common solution being to replace the entire engine.

engine.

~~Review: Hyundai Santa Fe (2006—2012) | Honest John~~
But some problems may still happen. Let's start with unpleasant features. The D4HB engine is noisy. All operation noise is produced mostly by valvetrain and timing chain. Sometimes, bad oil clogs the channel of the hydraulic tensioner circuit and the noise is greatly enhanced. The piezo-electronic injectors may cause unstable operation of the engine.
