~~Generalised Anxiety and Worry - WA Health~~

One of the important features of generalised anxiety is that the worry and anxiety is spread across a number of different areas such as health, work, interpersonal relationships, finances, and so on. This makes it different from other anxiety problems, such as social anxiety or phobias, where nervousness and worrying are more specific to particular situations.

When worry about work conditions was added to the regression models, this variable took over the role from psychological demands as a predictor for health complaints among the female ambulance personnel. The prevalence of sleeping problems, headache and stomach symptoms were significantly associated with psychological demands among both female and male ambulance personnel. Notably, worry about work conditions seems to be an important risk factor for health complaints.
