When installing new carbs, you'll find in almost every case, the throttle slide on one carb will be lower than the other carb. It's usually easiest to adjust the carb with the lowest slide. Note: If your carbs are opposite from the carbs in the picture above, just close the throttle and reopen it until the slide on the right carb just touches the top of the intake bell and use this same ...

Tuning and Jetting Mikuni Carbs - THE VINTAGE BIKE BUILDER

Installing Mikuni Carbs On Bmw What kind of Mikuni do you have? You may not know it, but not all Mikuni carbs are the same. That 24mm Mikuni that needs replacing on your 2005 Yamaha TTR125 isn't exactly the same as the VM24 aftermarket replacement carburetor sold by Niche Cycle. Yes the aftermarket carb will work great, but it isn't identical.

Installing Mikuni Carbs On Bmw Airhead

Any model BMW originally fitted with 32 mm Bings – and the 32 mm Mikuni VM set should be a better choice. Any additional engine system changes or performance work – and you're on your own. I fully understand that a Mikuni VM carb was never fitted as stock equipment to a BMW motorcycle by the factory.

Installing Mikuni 38 Roundslides - Page 2 - BMW MOA

In the carb world, bigger isn't necessarily better. Too big a carburetor won't make your bike faster – it'll make it run worse. If you don't know how big your carb is, you can measure the ID (inside diameter) of the venturi where the carb attaches to the manifold. On a Mikuni VM34, the

Mikuni Motorcycle Carburetors and Parts for sale | eBay

The Mikuni VM (round slide) and the Mikuni TM (flat slide) are popular as replacements for the Bings on Type-247 BMWs. A VM carb will not have an accelerator pump. The TM carb is available with (in certain sizes) or without an accelerator pump. Back in the day, TM kits offered on the market for the Type-247 BMW did not include APs.
