~~MyLab Programming | Pearson~~

~~NetBeans Enterprise Pack 5.5 Early Access runs on the Java 2 Platform Standard Edition Development Kit 5.0 Update 1 or higher (JDK 5.0, version 1.5.0_01 or higher), which consists of the Java Runtime Environment plus developer tools for compiling, debugging, and running applications written in the Java language.~~

~~Introduction to Programming I - NetBeans~~

~~Another example of a console program is the Java compiler called "javac." This is the program that will read the code in the HelloWorld.java file, and translate it into a language your computer can understand. This process is called compiling. Every Java program you write will have to be compiled before it can be run.~~

~~Creating Your First Java Program - ThoughtCo~~

~~Lab exercises (please code yourself and show the output to instructor): 1. Write a program to declare two integer and one float variables then initialize them to 10, 15, and 12.6. Also print the variable values in the screen. 2. Write a C program to prompt the user to input 3 integer values and print these values in forward and reversed order. 3.~~
