LabVIEW is a graphical, commercial programming environment from National Instruments. It is quite often used in robotics, instrumentation testing and certain types of industrial control applications. Since it is a data driven graphical programming environment, the experience is quite a bit different than programming with code driven textual languages, with its own advantages and disadvantages.

LabVIEW can be viewed as a programming language, but it is also an integrated development environment (IDE). When working with National Instruments controllers, such as the sb-RIO that is on the DaNI robots, the LabVIEW IDE makes the process of building programs and deploying them to run on external hardware a simple matter.
