Hello and welcome to the Home and Learn course for Excel VBA. This is a free beginners programming course, and assumes that you have no experience with coding. In this course you'll learn how to create your own macros, so that you can bring your Excel skills to the next level, and put yourself ahead of the competition.

---

Excel VBA Programming - Home and Learn

Excel VBA and Variables In computer programming, you need to store things in memory, things like numbers and strings of text. You store them so that you can retrieve them later and manipulate the numbers or strings of text in some way.

---

Excel VBA Programming - Variables - Home and Learn

That is how the Learn Math Fast System can teach two years of math in about two months. Other topics taught in volume 2 include cross multiplying, cross canceling, mixed numbers, negative numbers, and reducing fractions. These concepts are typically taught in the fourth and fifth grade, but there is no mention of grade level anywhere in the book. Each book cover looks as intellectual as the last, so older kids won't be embarrassed to carry a book that is below their grade level.
