Spectroscopic ellipsometry (SE) is a technique based on the measurement of the relative phase change of reflected and polarized light in order to characterize thin film optical functions and other properties. The measured data are used to describe a model where each layer refers to a given ma-

Lorentz Dispersion Model - Horiba

The classical dispersion model is based on the sum of the single and double Lorentz, and Drude oscillators.

- Lorentz dispersion model The Lorentz classical theory (1878) is

File Type PDF Lorentz Dispersion Model Horiba

based on the classical theory of interaction between light and matter and is used to describe frequency dependent polarization due to bound charge.
