means that you can remotely configure thousands of devices, across myriad locations, without having to deploy on-site staff each time you need to troubleshoot or reconfigure. Without a bottleneck of hardware controllers, Meraki is able to provide a high-density Wi-Fi solution designed to address ...

Meraki vs. Aruba vs. Aerohive—Choosing the Right AP ...

With Aerohive in a room next door behind a cinder block wall I was able to connect 70 plus devices while streaming a video. The Meraki was a different story while in the same room it stopped allowing connection of clients after 30 devices. Probably another thing that through me off was the Meraki push of the dashboard instead of the APs.

Bookmark File PDF Meraki Vs Aerohive Wireless Solution Comparison

Meraki has a more complete portfolio if you're looking for a single solution for your network infrastructure. Aerohive is probably stronger in terms of wireless (since that's their focus) by not really by much. Both are decent and fairly reliable solutions. There really isn't a clear winner in my book.

Meraki is cloud controlled while Aerohive is cloud managed. If the cloud is inaccessible for whatever reason Meraki is dead in the water (this comes from experience) while Aerohive just keeps working. Also when Aerohive comes out of support it just keeps working while, as the threads showed, Meraki shut the entire wireless network down.
