Dr. Dirckx has a Ph.D. in brain imaging and is a Senior Tutor at the Oxford Centre of Christian Apologetics. In her talk, she gives a fascinating overview of neuroscience and the philosophy of mind in which she explains the fallacies of materialism and the logical and scientific strengths of dualism (mind is not merely brain). Highly recommended!

Professor Maxwell Bennett is an internationally renowned neuroscientist and expert on the history and philosophy of brain and mind research. He has had a long-standing interest in studying the functioning of synapses and a wider philosophical interest in the relationship between the brain and our psychological attributes such as thinking, remembering and perceiving.

~~Neuroscience and Philosophy: Brain, Mind, and Language by~~ ...

In a recent podcast, neurosurgeon Michael Egnor talked with Robert J. Marks about the mind and its relationship to the brain and about different theories as to how the mind works. They talked about eliminative theories (the mind doesn't really exist) and emergent theories (the mind arises from matter) earlier and then the conversation turned to dualism:

In Cartesian philosophy the mind is a separate substance from the body, and is the location of all thought. Modern neuroscientists have rejected this Cartesian Dualism, claim Bennett and Hacker, but they have simply moved the location of thought from the mind to the brain, creating a kind of brain-body dualism.

Maxwell Bennett, Daniel Dennett, Peter Hacker, and John Searle. Introduction and Conclusion by Daniel Robinson. In Neuroscience and Philosophy three prominent philosophers and a leading neuroscientist clash over the conceptual presuppositions of cognitive neuroscience. The book begins with an excerpt from Maxwell Bennett and Peter Hacker's Philosophical Foundations of Neuroscience (Blackwell, 2003), which questions the conceptual commitments of cognitive neuroscientists.

~~Neuroscience and Philosophy | Columbia University Press~~

Neuroscience and Philosophy begins with an excerpt from Philosophical Foundations of Neuroscience, in which Maxwell Bennett and Peter Hacker question the conceptual commitments of cognitive neuroscientists. Daniel Dennett and John Searle then criticize their position, and Bennett and Hacker respond. Their impassioned exchange encompasses a wide range of central themes: the nature of consciousness, the bearer and location of psychological attributes, the intelligibility of so-called brain ...

~~Neuroscience and Philosophy: Brain, Mind, and Language — M~~ ...

Today cognitive neuroscience has a huge impact which is based on misunderstanding of the functions of the brain. The model is borrowed from neurology, in which brain damage, correctly, is related to behavioural symptms. The brain does not have this role in normal circumstances, in which it pemit, rather than controls behaviour.

~~Neuroscience and Philosophy: Brain, Mind, and Language~~ ...

While theoretical philosophy and especially the philosophy of mind provides widely acknowledged examples for some kind of interaction between empirical neuroscience and the a priori reasoning of philosophy, the possible interactions of neuroscience with other disciplines form the humanities is much less investigated.
