INTRODUCTION.

Enteral
nutrition is

Page 21/50

File Type PDF

Pediatric

Enteral as

providing
nutrients via
the

gastrointestinal
tract. Although
the term
technically
refers to
nutrition given
either by mouth
or through a
feeding tube, in
common usage,

File Type PDF

Pediatric

the term usually refers to tube feeding and includes feeding via nasogastric tube, gastrostomy tube, gastro-jejunosomy tube, or jejunostomy tube.

Overview of

Page 23/50

File Type PDF

Pediatric

enteral

nutrition in

infants and

children ...

This document
represents the
first
collaboration
between 2 organi-
zations—the
American Society
for Parenteral
and Enteral
Nutrition and

File Type PDF

Pediatric

the Society of
Critical Care
Medicine—to
describe best
practices in
nutrition
therapy in
critically ill
children. The
target of these
guidelines is
intended to be
the pediatric
critically ill

File Type PDF

Pediatric

patient (>1 month and <18 years) expected to require a length of stay >2-3 days in a PICU admitting medical, surgical, and cardiac patients.

Guidelines for the Provision

Page 26/50

File Type PDF

Pediatric

and Assessment

of Nutrition ...

These Guidelines
for Paediatric

Parenteral

Nutrition have

been developed

as a mutual

project of the

European Society

for Paediatric G

astroenterology,

Hepatology and

Nutrition

File Type PDF

Pediatric

(ESPGHAN;

www.espghan.org)

and the European
Society for

Clinical

Nutrition and

Metabolism

(ESPEN;

www.espen.org).

The guidelines

are addressed

primarily to

professionals

involved in

File Type PDF

Pediatric

supplying and
prescribing
parenteral
nutrition (PN)
to infants,
children and
adolescents.

Page 43/50

File Type PDF

Pediatric

Guidelines for the Use of Parenteral and Enteral ...

For confirmed TG
>250 mg/dL

(i.e., not drawn
off line

infusing lipid):

decrease lipids

to 1 g/kg/day,

follow daily

labs and resume

1 g/kg/day

File Type PDF

Pediatric

advances to goal
once <200 mg/dL.
Avoid doses <1
g/kg/day if
possible.

Calcium,

Magnesium,

Phosphorus Once
on ≥ 3 mEq Ca per
100 mL and
 ≥ 1.5 mmol Phos
per 100 mL, then
weekly PRN.

File Type PDF

Pediatric

Department of

Pediatric

Newborn Medicine

Clinical

Guideline

Initiate
nutrition at a
maximum of
40%-50% goal,
but usually
starting the
glucose infusion
rate around 4-6
mg/kg/min and

File Type PDF

Pediatric

advancing by 1–2 mg/kg/min daily as blood glucose levels allow until you reach a max of 14–18 mg/kg/min. This includes enteral as well as parenteral glucose.

**ASPEN Consensus
Recommendations**

Page 47/50

File Type PDF

Pediatric

**for Refeeding
Syndrome . . .**

Pediatric
patients may
require
specialized
enteral and
parenteral
nutrition in
order to meet
the daily energy
requirements for
appropriate
growth and

File Type PDF

Pediatric

development. The American Society for Parenteral and Enteral

Nutrition has developed guidelines for the nutritional management of pediatric and neonatal patients with various disease states.
