HTML 5. Students read about the moths and how they avoid predators by blending into their surroundings. They answer questions as they click through the background information before getting to the “game” which is actually more of a simulation or a modelling activity.

## Peppered Moth Game - The Biology Corner

Simulate changes in moth population due to pollution and predation, and observe how species can change over time. Students play a bluebird trying to survive by eating moths in a forest. In one forest, the bark is light colored and the other has dark colored bark, similar to Kettlewell's experiment. Students collect data and draw conclusions.

Peppered Moth Game. New Game.

Menu. How to Play. Guide the bird to the moths. Click on the moth to eat it. You have one minute to eat as many moths as you can. See what impact eating more light or dark moths has on moth population. Print Summary. Add an optional name in the box below to appear on the print summary.

### Peppered Moth Game - Ask a Biologist

Industrial melanism in the peppered moth, *Biston betularia* Linn., has been, and is, one of the most widely quoted examples of evolution in action. During the latter half of the nineteenth century, the white and black speckled form, *typica*, was all but replaced by the melanic form, *carbonaria*, in many industrial regions, but not in rural areas little affected by industrial
