Select this check box to show the percentage of time that good values were returned during the array time period. PI DataLink shows the percent-good values in a column to the right or in a row below returned values. Good values are recorded values that PI Data Archive determined were valid, and not in an error state. You might use the percentage of good values to assess the reliability of calculations built on PI point values, particularly if you use calculated values in further calculations.

The PI Trend functionality is still available in all versions of PI DataLink. However, starting in 2013 when PI DataLink was rewritten to use the AF SDK instead of the PI SDK, the PI Trend feature is in the Legacy add-in rather than the main add-in.Now, the Legacy add-in is no longer enabled by default in order to softly discourage its use, but it can be re-enabled using instructions in the ...
