The public health approach. The principles of public health provide a useful framework for both continuing to investigate and understand the causes and consequences of violence and for preventing violence from occurring through primary prevention programmes, policy interventions and advocacy. The activities of VPA are guided by the scientifically-tested and proven principles and recommendations described in the World report on violence and health.

For many health problems, a combination of primary, secondary and tertiary interventions are needed to achieve a meaningful degree of prevention and protection. However, as this example shows, prevention experts say that the further “upstream” one is from a negative health outcome, the likelier it is that any intervention will be effective.
