to a particular program to the exclusion of others. A second reason is that there are still many instructors of mathematical probability and statistics courses who prefer not to use any software at all. Given how pervasive computing is becoming in the use of statistics, the second reason above is becoming less compelling.

## *(ONLINE ONLY MARK SCHERVISH*

Probability and Statistics by Morris H. DeGroot The probability of any sample point can range from 0 to 1. The sum of probabilities of all sample points in a sample space is equal to 1. The following sample problems show how to apply these rules to find (1) the probability of a sample point and (2) the probability of an event.
