tasks and roadblocks that need clearing.

~~What is Scrum in Project Management?~~

What is Scrum Project Management? Scrum is a management framework that leverages incremental processes included in a larger framework that use cross-functional teams to meet goals and adapt to changes. Scrum aims to establish small pieces of a release faster than focusing on all of the smaller steps taking place within each iteration or sprint.

is a simple framework for effective team collaboration on complex products.

## ~~What is Scrum?~~

Scrum is an agile way to manage a project, usually software development. Agile software development with Scrum is often perceived as a methodology; but rather than viewing Scrum as methodology, think of it as a framework for managing a process.

## ~~Scrum Methodology and Project Management~~

The mitigation plan for the identified risks has to be prepared by the Project Manager so as to limit the
