~~Siemens S7 Plc And Fc~~

Step7 does not handle large blocks very well. When you get over 3kb the online performance is terrible. So I separate my program logic into chunks spread across several FC's. So for one machine I might have 5-8 FC's and use one DB for the entire machine. Here's another reason to use FC's for machine control vs. FB's:

~~Difference between FB and FC's~~

## ~~Function (FC) vs Function Block (FB) - PLC Programming ...~~

Siemens PLC Difference between FB and FC's Articles 7 and 8 in the above table are very important. FB has memory (except Temp variable), FC has no memory (cannot remember the result of the last scan cycle), To emphasize that the FC parameter is passed to the block to pass the address, remembering the address instead of a data.
