This text is designed for the introductory programming course or the software engineering projects course offered in departments of computer science. In essence, it is a cookbook for software engineering, presenting the subject as a series of steps (or rules) that the student can apply to successfully complete any software project. In contrast, Pressman's other book, "Software Engineering: A Practitioner's Approach, 5/e", (2001), is intended as a text for senior and graduate level courses ...
