Other developing countries such as Mexico, Nigeria, and Malaysia have established space-related programs (satellites) through their national policies. The space programs for these countries, both developed and developing, have practical value, political significance, and international recognition. For example, the United

Space Policy in Developing Countries: The Search for...

Space Policy in Developing Countries is an excellent and timely introduction to a fast changing field. How developing nations shape their space policies will impact not only rates of economic development, but also the shape of international relations in the twenty-first century and ultimately the manner in which humanity explores and eventually settles the final frontier.

Review—Space Policy in Developing Countries

To this end, both developed and emerging countries are stepping up their efforts in navigating the space industry, concurrently with the investment being made by the private sector – in what has been called the “ second space race ” – heavily relying on advances such as small satellites and reusable rockets (which substantially decrease the cost of space activities) and on new space activities, ranging from suborbital flights to space mining (which open up new sources of revenue).

Formulating Space Policies and Laws for Development and...

of having policy space does not imply that it is always put to good use. Some developing countries have used their policy space effectively and have been rewarded with accelerated development, while others have been less able to capitalise on existing policy autonomy. Effective use requires policy-makers to have a vision of where they

Policy Space: What, for What, and Where?

According to political scientist Robert C. Harding “ the short answer is that, like the United States and the Soviet Union before them, developing countries pursue active space policies because of the recognition that space is, in many ways, the ultimate measure of national power, international prestige, and demonstrated national potential ” (p. 4).
