The European Economic Community adopts its first Environment Action Programme, and starts developing a vast body of Community environmental legislation. An oil price shock is sparked by the Arab-Israel war and triggers action on energy efficiency. An explosion near Seveso, Italy, releases a toxic cloud containing dioxin.

## **1970s - European Environment Agency**

Although oil doesn't produce the same amount of CO<sub>2</sub> that coal burning does, it still contributes greenhouse gases to the atmosphere and increases global warming. Oil spills cause great environmental damage. Large oil spills sometimes occur during drilling, transport, and use, which of course affect the surrounding environment.

The Indian Ocean island of Mauritius, renowned for its coral reefs, is facing an unprecedented ecological catastrophe after a tanker ran aground offshore and began leaking oil. The 984-foot MV Wakashio ran aground on July 25 and began to break up due to rough waters. Mauritius depends on its oceans for fish and tourism.

## **Mauritius' First Major Oil Spill Poses Environmental ...**

Overall the Panel identified seven high priority research needs under the following five categories of concern: (1) effect of the environment on the fate and behaviour of oil; (2) oil toxicity and ecological effects, modelling oil spills in water; (3) a review of spill response options; (4) prevention and response decision making; and (5) risks from oil spills. Their recommendations attached time frames (ranging from 5 to 10+ years) associated with the research.

## **Oil | Environment | The Guardian**

Exploring and drilling for oil may disturb land and marine ecosystems. Seismic techniques used to explore for oil under the ocean floor may harm fish and marine mammals. Drilling an oil well on land often requires clearing an area of vegetation. However, technologies that significantly increase the efficiency of exploration and drilling activities also reduce effects on the environment.
