Farming tilapia: life history and biology. Worldwide harvest of farmed tilapia has now surpassed 800,000 metric tons, and tilapia are second only to carps as the most widely farmed freshwater fish in the world, reveal Thomas Popma, from Auburn University and Michael Masser from Texas A&M University, in a new publication by the Southern Regional Agricultural Center and the Texas Aquaculture Extension Service.

In all *Oreochromis* species the male excavates a nest in the pond bottom (generally in water shallower than 3 feet) and mates with several females.

*Tilapia: Life History and Biology*

The Nile tilapia (*O. niloticus*) was one of the first fish species cultured. Illustrations from Egyptian tombs suggest that Nile tilapia were cultured more than 3,000 years ago. Tilapia has been called "Saint Peter's fish" in reference to biblical passages about the fish fed to the multitudes.

*TILAPIA TERRITORY: Tilapia Life History and Biology*

The Tilapias belong to the family Cichlidae. Three genera are well-known namely *Oreochromis*, *Tilapia* and *Sarotherodon*, of which Nile Tilapia belongs to genus *Oreochromis*. This species is naturally distributed in Palestine, the Nile River as well as most part of African river and lakes. It was introduced in the Philippines in 1972.

*BASIC BIOLOGY OF TILAPIA*

Tilapia is a genus of fish in the cichlid (pronounced 'sishlid') family. These freshwater fish are native to Africa but have been widely introduced to warm waters in many countries. Their natural habitat is lakes but they are now extensively bred and reared in fish farms.

The Mozambique tilapia is an oreochromine cichlid fish native to southeastern Africa. Dull colored, the Mozambique tilapia often lives up to a decade in its native habitats. It is a popular fish for aquaculture. Due to human introductions, it is now found in many tropical and subtropical habitats around the globe, where it can become an invasive species because of its robust nature. These same features make it a good species for aquaculture because it readily adapts to new situations. It is know
