Trachoma is the blinding infection caused by Chlamydia trachomatis. 1 C. trachomatis is a Gram-negative bacteria that first evolved at the time of the dinosaurs. 2 Basically, every vertebrate species has evolved around its own particular species of Chlamydia. 3 The human strains separated into a predominantly ocular strain and general strains some 2-5 million years ago at about the time when early human ancestors were evolving; however, modern humans evolved only some 100,000 years ago.

~~Trachoma in Asia~~ ~~A disappearing scourge~~ ~~ScienceDirect~~

Trachoma is the leading cause of blindness due to infection worldwide. It is a bacterial infection of the eye, and though it causes irreversible blindness, trachoma can be treated if diagnosed early. There are over 177 million people that require treatment for trachoma, according to the World Health Organization.

~~Trachoma~~ ~~The END Fund~~

Most commonly, children with active trachoma do not present with any symptoms, as the low-grade irritation and ocular discharge is just accepted as normal, but further symptoms may include: Eye discharge Swollen eyelids Trichiasis (misdirected eyelashes) Swelling of lymph nodes in front of the ears ...

causes a chronic trachoma-like infection with pannus and conjunctival scarring. Mixed infection with both agents, however, produces a much more severe disease with rapidly blinding ophthalmia in half the cats (Jones, 1975). Surveys for preventable blindness from communicable ophthalmia These newly defined concepts make it clear that all

~~Communicable ophthalmia: the blinding scourge of Middle East~~

Trachoma is an ancient scourge. It is mentioned as early as 1550 BC in the ancient Egyptian Ebers Papyrus. In the 5th century BC the blinding stage of trachoma is included in *The Hippocratic Corpus*, the collection of work from the Hippocrates school of medicine. Appropriately, the word trachoma comes from the Greek word for rough. And rough it is.
