Rachana Phadke Ranade Sun King's Salvation Raid Guide - Normal/Heroic Sun King's Salvation Castle Nathria Boss Guide Z Stack User S Guide

Normally, Z-Stack loads the device's 64-bit IEEE address from FLASH upon power-up or reset. When the address has been reset (0xFFFFFFFF) by erasing the FLASH, the program waits in a loop, blinking LED1 (green). This prompts the user to establish a "temporary" address by pressing SW5 (joystick center).

PanID and Channel Selection. The ZigBee 2007 specification defines the use of a 16-bit Personal Area Network Identifier (PanID) to uniquely identify a network. Z-Stack provides the user with two methods of selecting a PanID when starting or joining a network by setting the value of ZDAPP_CONFIG_PAN_ID. For a Coordinator device, setting this value to 0xFFFF forces it to start a network with a PanID equal to the least significant 16-bits of its IEEE address.
